

Supfina live! - In-house exhibition, October 2009 14 and 15 October in Wolfach

Innovative machine concepts, technical know-how, talks and direct contact.

In attractive surroundings accompanied by considerable technical ability, Supfina Grieshaber GmbH & Co. KG, based in Wolfach, Germany, took centre stage on 14 and 15 October 2009.

In its Technology Centre, completed in 2003, this manufacturer of Surface Finishing Systems presented itself and its machines to a hand-picked audience of professionals.

The machines on offer at the show ranged from tried-and-tested Superfinish technology and double disk grinding to SpeedFinish® technology.

Visitors were particularly enthusiastic about the company's Lean Systems and, in particular, the brand new LeanCostMachine for small to medium-sized runs.

The talks by well-known individuals on topics relating specifically to Supfina's range of products attracted great interest from all present.

"We take an optimistic view of the future", emphasised Rainer Waltersbacher, Managing Director of Supfina Grieshaber GmbH & Co. KG.
